

After selecting the Yellow Ranger as your master, the instructions for his challenge will appear on your screen. What you have to do here is relatively straightforward: send electric shocks towards the moving targets to fry them a little bit. To do that, hold your mouse to build up power and release it to fire. But take care not to produce too much, or you will destroy the targets and eventually lose valuable points.

In the bottom right corner, you can see the number of targets that you have destroyed and how many are left untouched. Last but not least, do not forget about the power circle in the bottom left corner. When you prepare to hit the target, it will color itself accordingly with the power with which the next hit will have.

Last but not least, here comes the Red Ranger. Take his fire sword, block every incoming attack, and absorb all of its power. Do that until it loads all as much as it can and after that, aim at the source of the attacks and fire!

Gameplay in Power Rangers: Legacy Wars is original and very well adapted to touchscreen devices. Sliding your fingertip from left to right has you moving your character, but in order to launch attack moves you'll need to tap on different skills that appear progressively on-screen in the lower corner. Watch out, though, because using these skilled moves takes up part of your energy points. That way, you'll need to keep a close eye on your power levels while playing because your Power Ranger only recharges as you go.

Whenever you beat up a baddie and win a battle, you'll improve your characters' skill sets and power levels, but most importantly, you'll also gain access to newer, better Power Rangers to add to your collection. In total, you'll have over 40 different Power Rangers to choose from, each from its own movie and TV show incarnations.
